JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 300 Nos. 1 and 2 11 February 1991

CONTENTS

Editorial ... ix

Electrochemistry at fractal surfaces (Review)
T. Pajkossy (Budapest, Hungary) ... 1

Simulated fractal formation in electrochemical switching of conducting polymer film into an insulating form on the basis of the propagation theory of the conductive zone
K. Aoki (Fukui, Japan) ... 13

Electrochemical characterization of PANI–Nafion membranes and their electrocatalytic activity
M. Fabrizio, G. Mengoli, M.M. Musiani and F. Paolucci (Padova, Italy) ... 23

Electrochemical investigations of electronically conductive polymers. Part VI. Mechanism of the redox reactions for the electronically conductive form of polypyrrole
Z. Cai and C.R. Martin (Fort Collins, CO, USA) ... 35

Formation of a novel electroactive film by electropolymerization of 5-amino-1-naphthol
T. Ohsaka, M. Ohba, M. Sato, N. Oyama, S. Tanaka and S. Nakamura (Tokyo, Japan) ... 51

A general approach to the interpretation of electrochemical quartz crystal microbalance data. Part II. Chronoamperometry: temporal resolution of mobile species transport in polyvinylferrocene films
A.R. Hillman, D.C. Loveday (Bristol, UK) and S. Bruckenstein (Buffalo, NY, USA) ... 67

The growth of polypyrrole films on electrodes
B.R. Scharifker, E. García-Pastoriza and W. Marino (Caracas, Venezuela) ... 85

An electrochemical study of pyrrole / *N*-methylpyrrole copolymer
P. Novák and W. Vielstich (Bonn, FRG) ... 99

Electron-transfer from NADH dehydrogenase to polypyrrole and its applicability to electrochemical oxidation of NADH (Short Communication)
T. Matsue, N. Kasai, M. Narumi, M. Nishizawa, H. Yamada and I. Uchida (Sendai, Japan) ... 111

Quinone-mediated glucose oxidase electrode with the enzyme immobilised in polypyrrole
P. Janda and J. Weber (Prague, Czechoslovakia) ... 119

An electron spin resonance (ESR) and simultaneous electrochemical and electron spin resonance (SEESR) spectroscopic study of motion, stability and potential controlled release of radical guests from the β-cyclodextrin inclusion polymer
A. Petr, L. Dunsch (Dresden, FRG), D. Koradecki and W. Kutner (Warsaw, Poland) ... 129

Voltammetric behaviour of copper complexes with the antitumour drug 6-mercaptopurine
R. Bilewicz and E. Muszalska (Warsaw, Poland) ... 147

Spectroelectrochemical and spectrophotochemical properties of *N*-tetradecyl-*N'*-ethyl-viologen
M. Łapkowski and W. Szulbiński (Gliwice, Poland) ... 159

Reaction entropies for the electrochemical oxidation and reduction of 1,3,5-triphenylverdazyl free radicals in different solvents
J.S. Jaworski (Warsaw, Poland) ... 167

Some studies of electrode made from single crystals of TTF · TCNQ
P.N. Bartlett (Coventry, UK) ... 175

Ac impedance characteristics of human dental enamel and dentine
T.J. VanderNoot and M. Levinkind (London, UK) ... 191

Limitations in the analysis of ac impedance data with poorly separated faradaic and diffusional processes
T.J. VanderNoot (London, UK) ... 199

Charge transfer and recombination kinetics at photoelectrodes. A quantitative evaluation of impedance measurements
J. Schefold and H.-M. Kühne (Stuttgart, FRG) 211

The impedance behavior of the cell Au / $HClO_4 \cdot 5.5\ H_2O$ / Au in the temperature range 4.2–300 K
M. Cappadonia and U. Stimming (Berlin, FRG) 235

Surface state assisted electron tunneling through a space charge layer
S. Nakabayashi and A. Kira (Saitama, Japan) 249

Study of reaction coupling and interfacial kinetics at semiconductor electrodes by band edge shift measurements
P. Allongue, S. Blonkowski and D. Lincot (Paris, France) 261

Radiation damage and doping by implantation of Ti or Pd ions into TiO_2 layers on Ti
M. Wolff, J.W. Schultze (Düsseldorf, FRG), J.-L. Delplancke (Brussels, Belgium), Ch. Buchal (Jülich, FRG) and L. Elfenthal (Leverkusen, FRG) 283

Ultrathin layer convolution
J. Leddy (Flushing, NY, USA) 295

Optimization of ac voltammetric measurements at ultramicroelectrodes
A.S. Baranski (Saskatoon, Canada) 309

Catalytic electrooxidation of hydrazine at the nickel ferricyanide modified electrode: can an array of surface bond one-electron redox centers act in concert?
C. Lin and A.B. Bocarsly (Princeton, NJ, USA) 325

Determination of ultramicroelectrode array dimensions at graphite and one-dimensional organic conductor electrodes using simulations, chronocoulometry and chronoamperometry
M.S. Freund and A. Brajter-Toth (Gainesville, FL, USA) 347

Ring-modified carbon fiber microelectrodes and multi-microelectrode devices
C.-L. Wang, K.E. Creasy and B.R. Shaw (Storrs, CT, USA) 365

Lateral diffusion in organized bilayer assemblies of electroactive amphiphiles. Influence of the oxidation state of the amphiphile investigated by steady-state methods involving an interdigitated micro-electrode array device
C.A. Goss and M. Majda (Berkeley, CA, USA) 377

Selective complexation of biogenic amines by macrocyclic polyethers at a liquid / liquid interface
O. Dvořák, V. Mareček and Z. Samec (Prague, Czechoslakia) 407

Kinetics of the transfer of acetylcholine across the water nitrobenzene–tetrachloromethane interface. The Gibbs energy of transfer dependence of the standard rate constant
Y. Shao, J.A.Campbell and H.H. Girault (Edinburgh, UK) 415

Current–potential curves for facilitated ion transfer across oil / water interfaces in the presence of successive complex formation
T. Kakiuchi and M. Senda (Kyoto, Japan) 431

In situ second harmonic generation studies of chemisorption at well-ordered Pt(111) electrodes in perchloric acid solutions
M.L. Lynch, B.J. Barner and R.M. Corn (Madison, WI, USA) 447

The electrochemical behaviour of irreversibly adsorbed palladium on Pt(111) in acid media
G.A. Attard and A. Bannister (Cardiff, UK) 467

Structure, composition, thermal stability and electrochemical reactivity of $HS^-_{(aq)}$-derived species chemisorbed at Pd(111) electrode surfaces
T. Mebrahtu, M.E. Bothwell, J.E. Harris, G.J. Cali and M.P. Soriaga (College Station, TX, USA) 487

Voltammetric and radioactive labeling studies of single crystal and polycrystalline rhodium electrodes in sulfate-containing electrolytes
P. Zelenay, G. Horányi, C.K. Rhee and A. Wieckowski (Urbana, IL, USA) 499

Influence of competing adsorbates on the underpotential deposition of copper on Pt(111)
J.H. White and H.D.Abruña (Ithaca, NY, USA) 521

Electrochemical atomic layer epitaxy (ECALE)
B.W. Gregory and J.L. Stickney (Athens, GA, USA) 543

An examination of the relationship between surface enhanced Raman scattering (SERS) intensities and surface concentration for pyridine adsorbed at the polycrystalline gold/aqueous solution interface
L. Stolberg, J. Lipkowski (Guelph, Canada) and D.E. Irish (Waterloo, Canada) 563

Components of the measured surface charge of low temperature ceramic oxides
S. Ardizzone and G. Bassi (Milan, Italy) 585

The influence of the preparation temperature of colloidal ruthenium dioxide on the photosensitized reduction of H^+ ions
J.M. Kleijn and G.K. Boschloo (Wageningen, Netherlands) 595

Different types of phase transitions at charged interfaces. A thermodynamic analysis
P. Nikitas (Thessaloniki, Greece) 607
